FIG. 3

Fig. 4

A schematic diagram of a semiconductor device cross-section. The diagram shows a central region labeled 200, which is a well or channel. This region is surrounded by a layer labeled 204. Above the central region, there is a layer labeled D_H . Below the central region, there is a layer labeled 216. To the right of the central region, there is a layer labeled 212. The diagram includes several arrows indicating directions or forces: a large arrow pointing left from the top left, a large arrow pointing right from the top right, a large arrow pointing left from the bottom left, and a large arrow pointing right from the bottom right. A small arrow points from the label 200 to the central region. A small arrow points from the label 204 to the layer below the central region. A small arrow points from the label 216 to the layer below the central region. A small arrow points from the label 212 to the layer to the right of the central region.
